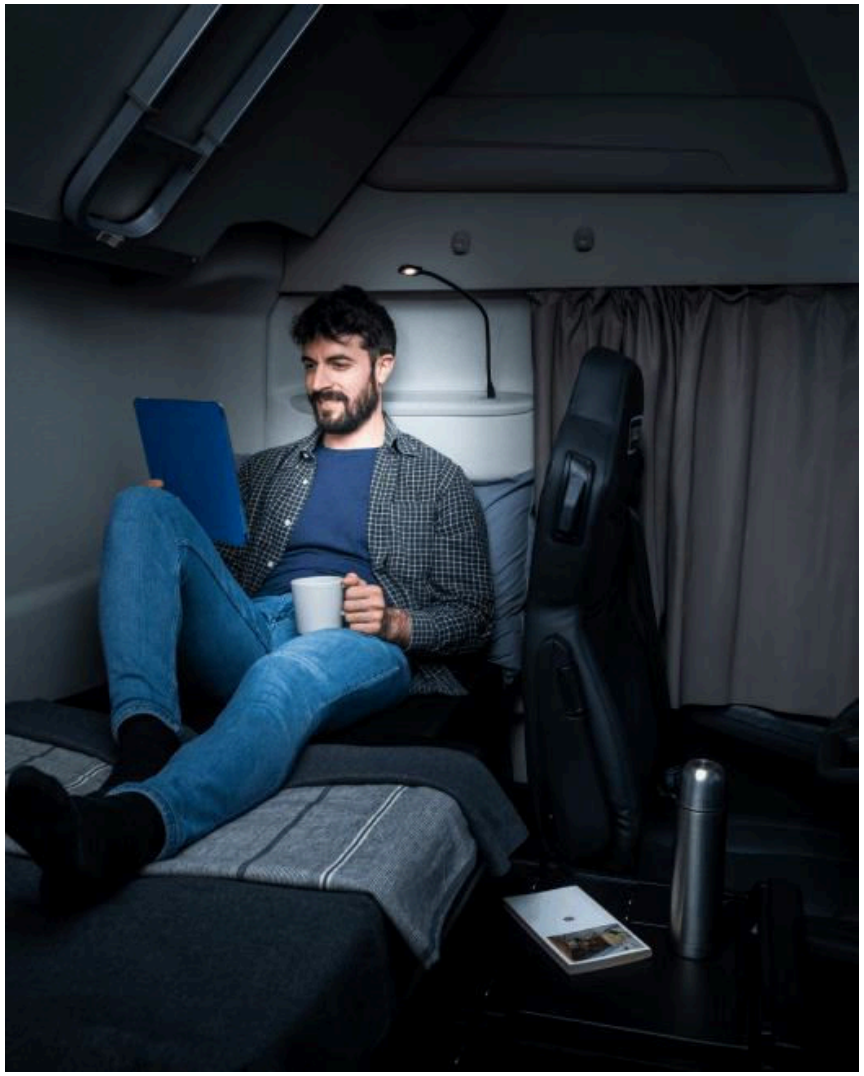
Exceptional Comfort On Board



The entire driving area is designed for space, excellent visibility, and driver-focused ergonomics. Every detail- from the fully adjustable steering wheel to the fully customisable dashboard—is engineered for comfort, safety, and responsiveness.

The dashboard features a 10" TFT instrument cluster and infotainment system, with premium materials and finishes. The more vertical steering wheel and lower driving position provides a state-of-the-art "car like" feeling and greater comfort. Drivers can choose leather or fabric upholstery, enjoy enhanced cushion comfort, and benefit from improved driving ergonomics. The new electric parking brake engages automatically, simplifying operations and increasing safety.

Rest relax and sleep well
The symmetrical layout of the night area has been designed so you can enjoy a good night’s rest in great comfort. You can sleep soundly and safely with the the night-time safety lock integrated in the central locking system. The one-piece lower bunk is available with a choice of soft or hard mattress. The Smart or Comfort upper bunk can be used as a luggage compartment or a passenger bed.

Perfect lighting vs common
100% full LED - inside and out, including the marker lights - give you the perfect illumination inside the cab and on the road for safe night-time driving. LEDs also improve durability vs traditional solutions.
