

Seamless recharging at majority of the charging stations across Europe

Our vehicles have been rigorously tested for interoperability during the IVECO Interoperability Tour, ensuring seamless compatibility with a wide range of charging stations across Europe. With a steadily growing list of approved chargers, drivers can recharge with confidence wherever they go.

We also offer expert consultancy on charger installation to help our customers optimise their charging infrastructure for efficiency and reliability. Our HV charging architecture, field-proven on rigid vehicles, demonstrates robust performance in real-world conditions.
