

A layout for every application

Choose the best battery pack configuration to suit your application. From 350kWh standard with 5 batteries, you can choose a 7 battery 490kWh arrangement for missions requiring greater range or extensive PTO use. For lower energy use applications a 4 battery 280kWh arrangement will also free up the right-hand sidemember for applications such as lateral loading refuse collection.

Power Take Offs to suit all applications. Choose between mechanical or High Voltage Electric for higher power requirements or Low Voltage Electric for Taillifts etc.

The Microwast Battery have been designed for a lifetime of 12 years and 1.2 mln km, with a 70% SoH at End of Life.

			
BATTERY PACK	2 + 1 + 2	3 + 1 + 3	3 + 1 + 0
Energy on Board Nominal	350 kWh	490 kWh	280 kWh
Energy on Board Usable	300 kWh	420 kWh	240 kWh
