

Exceptional comfort on board

The entire driving area has been designed to provide space and excellent visibility. Every single detail has been designed to meet the needs and expectations of the driver. Steering wheel and controls ensure comfort and safety for the driver in every operation.

The dashboard is customisable with new materials and colours, with a fully adjustable steering wheel, full TFT instrument cluster and infotainment. State of the art "car like" feeling with more vertical steering wheel and lower driving position enhance comfort and responsiveness.

Choose between the leather or fabric upholstery of seats and discover the enveloping comfort of the cushions and the improved driving ergonomics. The new electric parking brake is engaging automatically to simplify operations and increasing safety.

Rest relax and sleep well

The symmetrical layout of the night area has been designed so you can enjoy a good night's rest in great comfort. You can sleep soundly and safely with the the night-time safety lock integrated in the central locking system. The one-piece lower bunk is available with a choice of soft or hard mattress. The Smart or Comfort upper bunk can be used as a luggage compartment or a passenger bed.

Perfect lighting vs common

100% full LED - inside and out, including the marker lights - give you the perfect illumination inside the cab and on the road for safe night-time driving. LEDs also improve durability vs traditional solutions.
